

Create HTTP Requests To Communicate With Mobile App

Node red flow

Http requests

The screenshot shows the Node-RED web interface. On the left, the 'common' and 'function' node palettes are visible. The main workspace contains a flow with an 'IBM IoT' node connected to a 'function' node. The 'Edit http in node' panel is open, displaying the following properties:

- Method: GET
- URL: /sensor
- Name: Name

The right sidebar shows the 'info' tab with a search bar and a list of flows and nodes. The selected node is '[get] /sensor'.
